Art Unit: 1609

DETAILED ACTION

1. The examiner of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Larry Riggs, art unit 1609.

- 2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 13, 2006 has been entered.
- 3. Claims 92-129 were amended on January 5, 2006 under Petition for Review.

 Claims 92-129 were amended again with the Request for Continued Examination and are pending and under consideration.
- 4. On review of the record, applicant's argument that claims require 10 sequences selected from 3A or 10 sequences selected from 3B...is convincing. However, with this understanding of the claim construction, it is now clear that the crux of the invention is a comparison of a particular sample with a combination of specific sequences. There are 19 tables, between 100-500 sequences per table, and each sequence appears to be unrelated to the others in structure and function. Furthermore, none of the sequences in Tables 3A-3S are identified by SEQ ID number.

Application/Control Number: 09/917,800 Page 3

Art Unit: 1609

Searching all sequences and combinations of sequences listed in Tables 3A-3S presents a very serious burden on the examiner. Therefore an election is required.

Election/Restrictions

- 5. Claims 92-129 are drawn to method claims reciting different combinations of individual nucleotide sequences. Applicant is required to select one combination of nucleotide sequences for examination. If the selected combination contains ten or fewer sequences, all of the sequences of the combination will be searched. If the selected combination contains more than ten sequences, the combination will be searched until one nucleotide sequence is found to be allowable. The order of searching will be chosen by the examiner to maximize the identification of allowable sequence. If no individual nucleotide sequence is found to be allowable, the examiner will consider whether the combination of sequences taken as a whole renders the claims allowable. The identification of any allowable sequences(s) will cause all combinations containing the allowed sequence(s) to be allowed. See O.G. 68 (November 19, 1996).
- 6. Applicants are requested to point to any novel sequences in the elected combination to aid in searching.
- 7. For the reasons given above, there would be a serious burden on the examiner if restriction is not required because the invention requires a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larry D. Riggs II whose telephone number is 571-270-3062. The examiner can normally be reached on Monday-Thursday, 7:30AM-5:00PM, ALT. Friday, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mary Mosher can be reached on 571-272-0906. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
